

**LifeChoiceVR and Virtual Reality Training System:
Social Skills Training 2.0 - new standards
in interpersonal education**

This presentation will introduce "LifeChoiceVR," a VR platform specifically designed for teenagers in educational and therapeutic contexts. LifeChoiceVR uniquely combines immersive VR experiences with the interactive capabilities of CinematicVR's VR Training System. This innovative system enables the creation and modification of interactive VR films without requiring programming knowledge, offering a flexible, user-friendly interface. LifeChoiceVR takes advantage of this technology to engage adolescents in social and psychological learning. The session will explore the integration of this system into LifeChoiceVR, demonstrating how it enhances educational and therapeutic processes for teenagers. The collaboration between LifeChoiceVR and CinematicVR's robust training system illustrates the potential of VR in revolutionizing psychological education and therapy for young people.
